

ANI HOVHANNISYAN

Junior Front-end Developer

eny.hovhannisyan@gmail.com | +37498767429 | [GitHub](#) | [LinkedIn](#)

PROFESSIONAL SUMMARY

Motivated Junior Front-End Developer with experience building responsive and functional web applications through both independent and real-world team projects. Skilled in HTML5, CSS3, SCSS, JavaScript, Next.js, React.js, MobX, Redux, and TypeScript, with a strong commitment to clean code practices and continuous learning. Capable of integrating front-end components with backend endpoints. Proficient in translating UI/UX designs from Figma and Adobe Photoshop into polished, user-friendly interfaces. Eager to contribute to dynamic, innovation-driven environments.

EXPERIENCE

Front-End Intern – Freelance March 2025-Present

- Crypto-Based E-commerce Platform | Team Project | Stack: Next.js, MobX, Tailwind CSS | Private Repository
- Developed core marketplace functionality including product filtering/sorting, search, and cart management
- Contributed to homepage UI and functionality: categorized products, real-time cryptocurrency tracker.
- Capable of integrating front-end components with backend endpoints.
- Collaborated through GitHub in version control, working closely with front-end and back-end teams.

Independent Projects & Skill Development | [Portfolio](#) January 2023-Present

Junior Front-end developer

- [React Online Bookshop](#) -Responsive bookshop: add/ increase/decrease/remove books. Features: search, pagination. Implemented custom fake JSON API and deployed the application.
- [React-Redux E-commerce Shop](#) -Responsive online store: product pages, cart management, sorting. Features:notifications with react-toastify, login/registration. Custom fake JSON API for book data, deployed.
- [React-TypeScript Star Wars App](#) -Utilized the Star Wars API. Features: pagination, search, character pages.
- [React Quiz App](#) -Built with React.js. Focus on user engagement and problem-solving skills.
- [Tic Tac Toe Game](#) -Game using JavaScript. Emphasized clean code and user engagement.
- [SCSS website](#) -Designed and developed a website utilizing SCSS for advanced styling, incorporating animations and a bit of JavaScript for interactive elements.
- [HTML-CSS Solar System Website](#) - Responsive website with extensive CSS animations. Features: interactive buttons. Awarded first place in a competition by an Armenian company.
