ABOUT

I'm a junior React.js developer, looking for an internship to develop my skills and abilities, as well as make a small contribution to the company's activities, which will give me the opportunity to demonstrate my abilities.

In order to have a little experience before applying for an internship, I've made some web apps using mostly React.js, but also Vanilla JS and Redux. I also paid attention to the use of HTML and CSS features. One of the projects, made exclusively with HTML/CSS, won first place in the company.

My previous work experience/details are available in the portfolio/ helped me to understand the importance of teamwork, but I would like to point out that I can also work alone. I've worked alone the entire time I've been developing web apps and I tried to find the solution myself whenever I encountered any problem.

I am hardworking and responsible, I do everything possible to complete the work on time and with quality. I am also ready to work extra hours if there is a need for it.

EXPERIENCES

2018 Apr - 2021 Jun
